What results from loose deck bolts? Loose or lost cylinder keys? How should they be treated? A. This causes a pound and results in either breaking the bolts or if allowed to run in this condition, will wear the holes out of round. Loose deck bolts should be reported as soon as discovered. A loose cylinder key should be tightened at once. If lost, something should be substituted. Rail spikes will answer the purpose. If allowed to run in this condition, it is liable to result in loosening the cylinder on the frame. 79 Q. Why is it necessary that pedestal braces or binders be kept tight and to maintain good fit? A. Because if allowed to run loose it would result in the frame breaking, usually at the junction of either pedestal jaw with the main frame. 80 Q. How can a pound in driving boxes or rod brasses be located, and how should these pounds be treated? A. Place engine on top quarter, blocking drivings wheels on opposite side. Give engine steam and have fireman work reverse lever past center and watch all points. If crown brass in driving box is loose or badly worn, it should be reported. If wedge is loose it should be set up. If set up as far as it can be, it should be reported to be lined down. If binder is found loose it should be tightened. If rod...
